WeatherCote 3000 - Technical Data

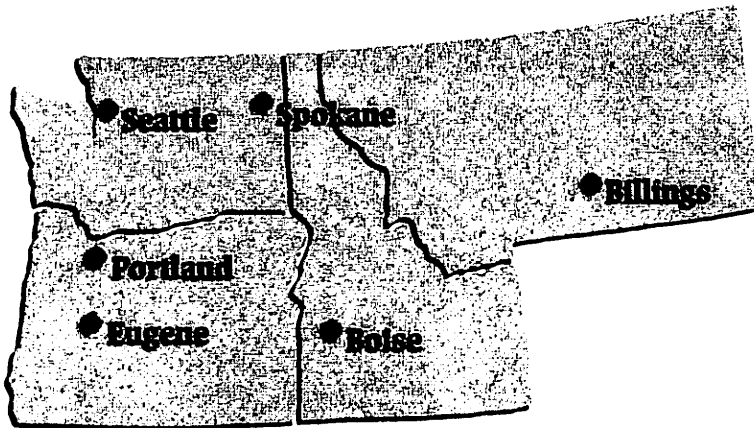

30 Year Manufacturer's Limited Warranty available at time of purchase.

This unique fluoropolymer-based coating will not peel, chalk, chip, blister, flake or crack for a period of 30 years from the date of installation except for such crazing or slight cracking as may occur on tightly roll-formed edges or brake bends at the time of forming prepainted sheet and which is accepted as standard.

Pencil Hardness	ASTM D-3363	HB minimum
Flexibility	ASTM D-4145	2T No tape off
Impact Resistance	ASTM D-2794	1.5x metal thickness in inch-lbs of force w/o adhesion loss
Gloss	ASTM D-523	Gardner Glossmeter @ 60 degrees
Humidity	ASTM D-2247	Passes 1000 hours
Salt Spray	ASTM B-117 ASTM D-714 / D-1654	Passes 1000 hours on coated steel No blisters / #8 scribe creep
IR Reflectivity	ASTM E-903-96	0.25 (25%) minimum
Emissivity	ASTM E-1918-97	0.80 (80%) minimum
Crosslink Test	NCCA 11-18	100+ double MEK rubs
QUV Weatherometer	ASTM G-23	Passes 3000 hours
South Florida Exposure	ASTM D-2244 ASTM D-4214	Less than 5 units color change Rating of 8 minimum

Custom colors and sizes available upon request. Colors shown are approximate. Painted metal samples are available. Pacific Metal reserves the right to change color offering contained herein without notice.

All WeatherCote 3000 colors meet Energy Star's initial total solar reflectance requirements for steep slope roofs.
